

# SiePortal User Guide

A comprehensive overview of the most relevant SiePortal features and information

# WELCOME TO THE SIEPORTAL USER GUIDE

This user guide offers a **detailed walkthrough**, from registration, site navigation, to ordering, utilization and operations. It also provides a deep dive into **SiePortal's most important self-service features**, empowering you to fulfill your daily tasks completely digitally.

**While this guide is ideal for new users**, it also offers **useful insights for Company Managers** on how to efficiently administrate their companies on SiePortal.

# SiePortal Guide

## – Find and select products & services

How to find and select products and services on SiePortal

# Find products & services on SiePortal

## Search for products

### Easily find what you are looking for with the SiePortal search

1. Use the search bar to find products. You can use keywords or other criteria (e.g., article number, customer article number, product description).
2. As you type, suggested search results and results based on your search history will appear.
3. Switch between the 'Products & Services', 'Knowledge Base', and 'Forum' tabs to display search results from the respective categories.
4. The search results provide descriptions of relevant products and prices.
5. You can refine the results via the filters on the left side. Select one product to receive more information.
6. Filter by a preferred product category. Click 'Show full tree' to switch views between full product tree or the sections of the suggested product nodes where the search term was found.

[Return to Table of Contents](#)

The screenshot shows the Siemens SiePortal mySiePortal dashboard. At the top, there is a navigation bar with 'SIEMENS SiePortal' and a search bar. Below the navigation bar, there are tabs for 'Home', 'Products & Services', 'Support', and 'mySiePortal' (highlighted with a blue '1'). The main content area is titled 'Add new widget' and features a 'Recently viewed' section with a list of items. On the left side, there is a navigation bar with icons for 'My conversations', 'Installed products', 'Service request', 'Lists & notifications', and 'Product data & documentation' (highlighted with a blue '4'). Below the 'Recently viewed' section, there is a section titled 'Add more widgets to dashboard' with three widgets: 'My favorites', 'My searches', and 'My notifications' (highlighted with a blue '2'). At the bottom right, there is a 'Adjust Dashboard' button (highlighted with a blue '3') and a 'Save changes' button. A blue arrow points from the 'Adjust Dashboard' button to a smaller inset image showing the dashboard after adjustment.

**Save time and have your most used information at one place** by tailoring your mySiePortal with the available widgets to your specific needs.

1. Access mySiePortal via the main navigation
2. Personalize your dashboard by using the available widgets. Click on 'Add new widget' or select one of the available widgets below.
3. Edit your widgets (e.g., deleting, moving, changing the size) by clicking on 'Adjust dashboard'.
4. Access multiple SiePortal areas such as 'My conversations', 'Installed products', 'Service requests', 'List & notifications' and 'Product data & documentation' via the navigation bar on the left side. *Note:* Depending on your user rights you may have more options for your dashboard.

# Utilize (Self-) Services on SiePortal

## Create a self-quote

1

2

3

4

The screenshots illustrate the steps to create a self-quote in SiePortal:

- Cart Management:** The user navigates to the shopping cart, which contains four items. The 'Generate Quote' button is highlighted in the 'Cart Management' dropdown menu.
- Generate Quote:** The user clicks the 'Generate Quote' button, which initiates the quote creation process.
- Quote Overview:** The system displays the 'Quotes Overview' page, showing a list of generated quotes. The 'Generate Quote' button is highlighted in the 'Quotes Overview' dropdown menu.
- Quote Details:** The user clicks on a specific quote (DEQ00021992) to view its details, including item list, price, and status.

**Note:** A Self-Quote can only be generated if all products in the shopping cart have a price. As a rule, no price can be determined for unknown products or spare parts. If such items are contained in the shopping cart, automatic generation of a Self Quote is not possible. A Self Quote is also not possible for shopping baskets with a value > €100,000. In this case, please use the function described to request the offer from us separately or contact your sales representative directly.

- The 'Self Quote' function allows you to create an official Siemens quote. Add products to your cart.
- Click on 'Generate Quote'.
- The quote will be created within a few seconds. You have the option of downloading this offer as a PDF, forwarding it to other SiePortal users in your company, or converting the offer directly into an order.
- Open the 'Quotes Overview' in mySiePortal to see all quotations generated for your company.

There are several options to choose from in the Actions column:

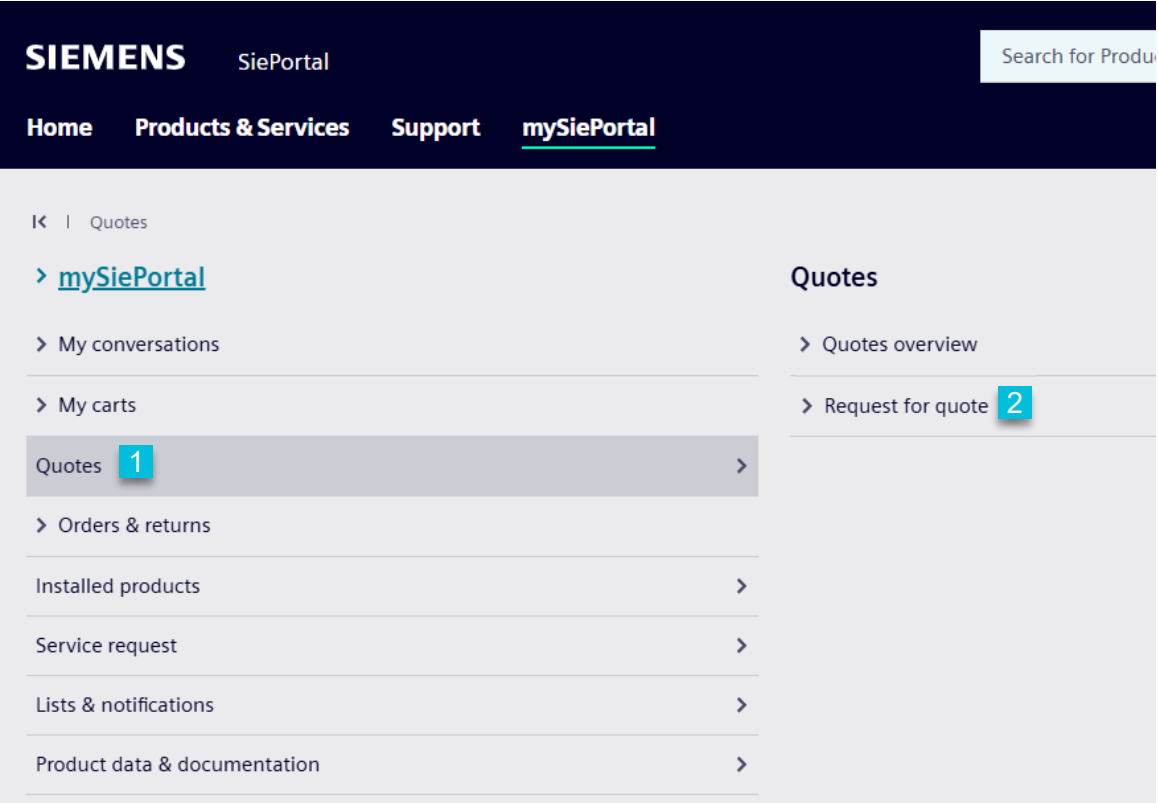

- Call up quote details with direct ordering option
- Call up quote details for quotes whose validity has expired or if you do not have the right to order
- The quote can be downloaded as a PDF file
- Display information regarding the creation of the quote
- If attachments have been attached to the quotation, these can be downloaded using the bracket symbol.

If the validity period has expired, you can reactivate a Self Quote.

# Utilize (Self-) Services on SiePortal

## Request an offer

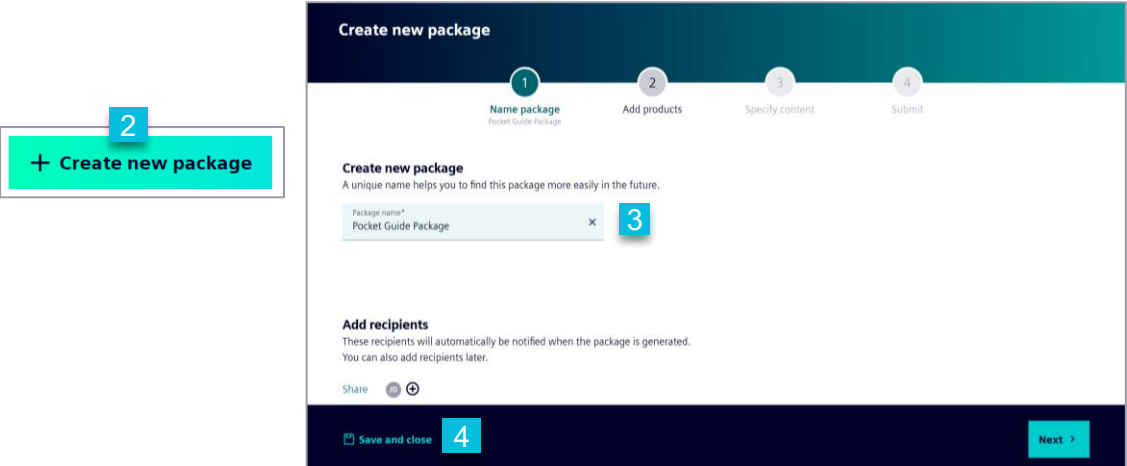

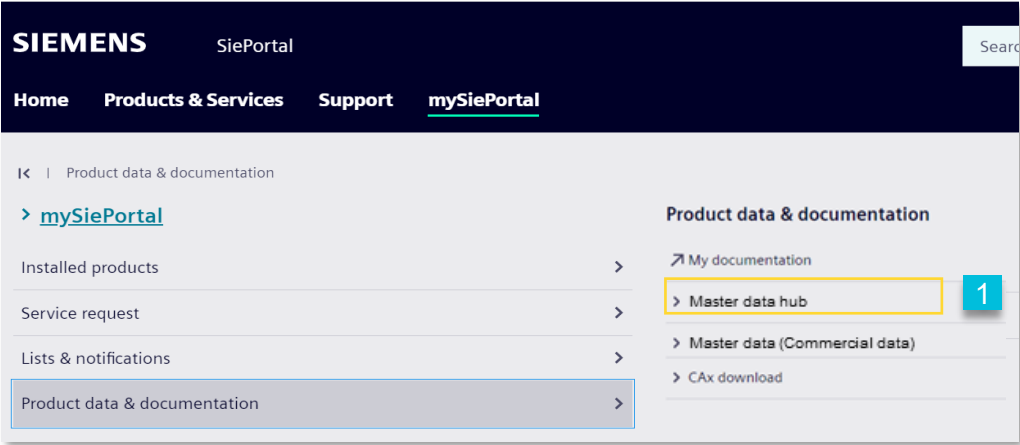

1. If you need a separate offer for your active shopping cart, please click on 'mySiePortal' in the main navigation and select 'Offers'.
2. Select 'Request a quote'.
3. Check the box if you want your shopping cart to be deleted after placing your order. Then click 'Next'.
4. You have the option to specify other recipients for the offer. Then click 'Next'.
5. Click 'Finish'.

[Return to Table of Contents](#)

# Utilize (Self-) Services on SiePortal

## Create product data download

**Note:** This feature is only available for business account users.

1. Request product data for a specific product range. Find the feature in the main navigation *menu > mySiePortal > Product data & documentation > Master data hub*.  
**Please note:** You can access your old packages via the button 'Master data (Commercial data)'.
2. To generate a product data download, click 'Create new package'. If you have access to multiple companies, select the appropriate one from the dropdown menu before creating a new package.
3. Keep the default name or change the name of your package.
4. Click 'Save and close' to save your package as a draft. You can continue later from where you left off. Learn more about the product data download [here](#).

**Note:** For larger requests and depending on the workload, the processing time may vary.

[Return to Table of Contents](#)

# Utilize (Self-) Services on SiePortal

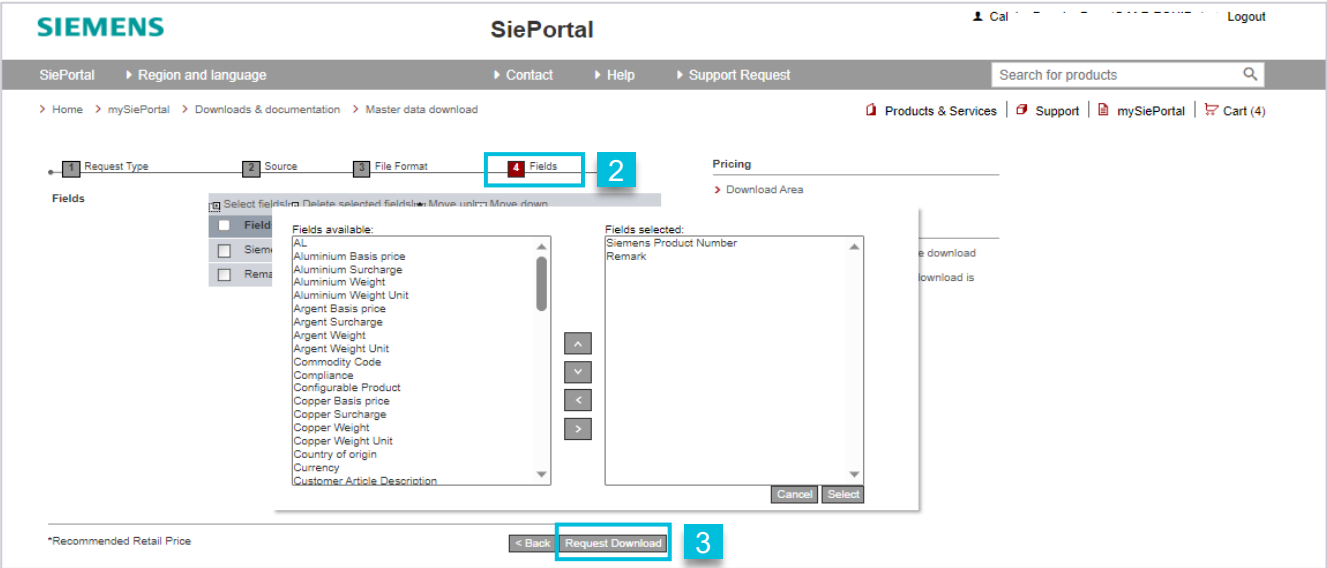

## Create product master download

Request product master data for a specific product range.

1. Find the feature on SiePortal via the main navigation menu: mySiePortal > Master data (commercial data) OR, if you are in Industry Mall, via Support > Master data download.
2. In step 4, 'Data fields', you can select which fields should be included in the master data request by clicking on 'Add fields.'
3. After filling in all required fields, click on 'Request Download.'

*Note:* For larger requests and depending on the workload, the processing time may vary.

Add to Cart

There are several ways to add an item to your shopping cart:

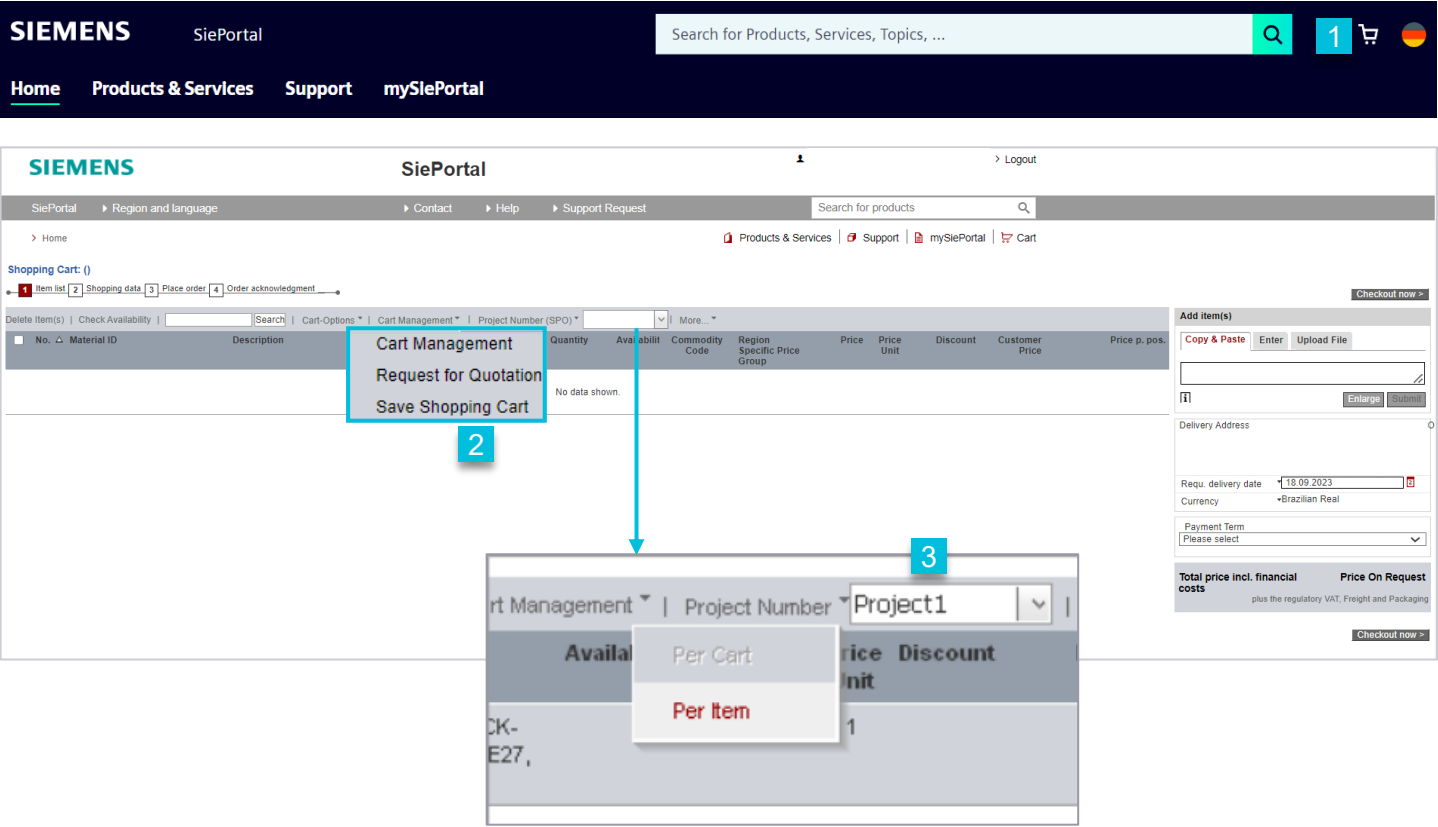

- 1. From the catalog**  
Search the product catalog for your desired products, enter the quantity, and add the product to the cart.
- 2. From a search**  
Select products from your search results, enter the desired quantity, and add them to your cart.
- 3. Copy & Paste**  
On the right side of the cart, you'll find an area to add items. Select the 'Copy & Paste' tab and copy your parts line by line into the input window.
- 4. Enter single product**  
Enter a part number. For materials with additional options, more input fields will automatically appear.

## Cart management

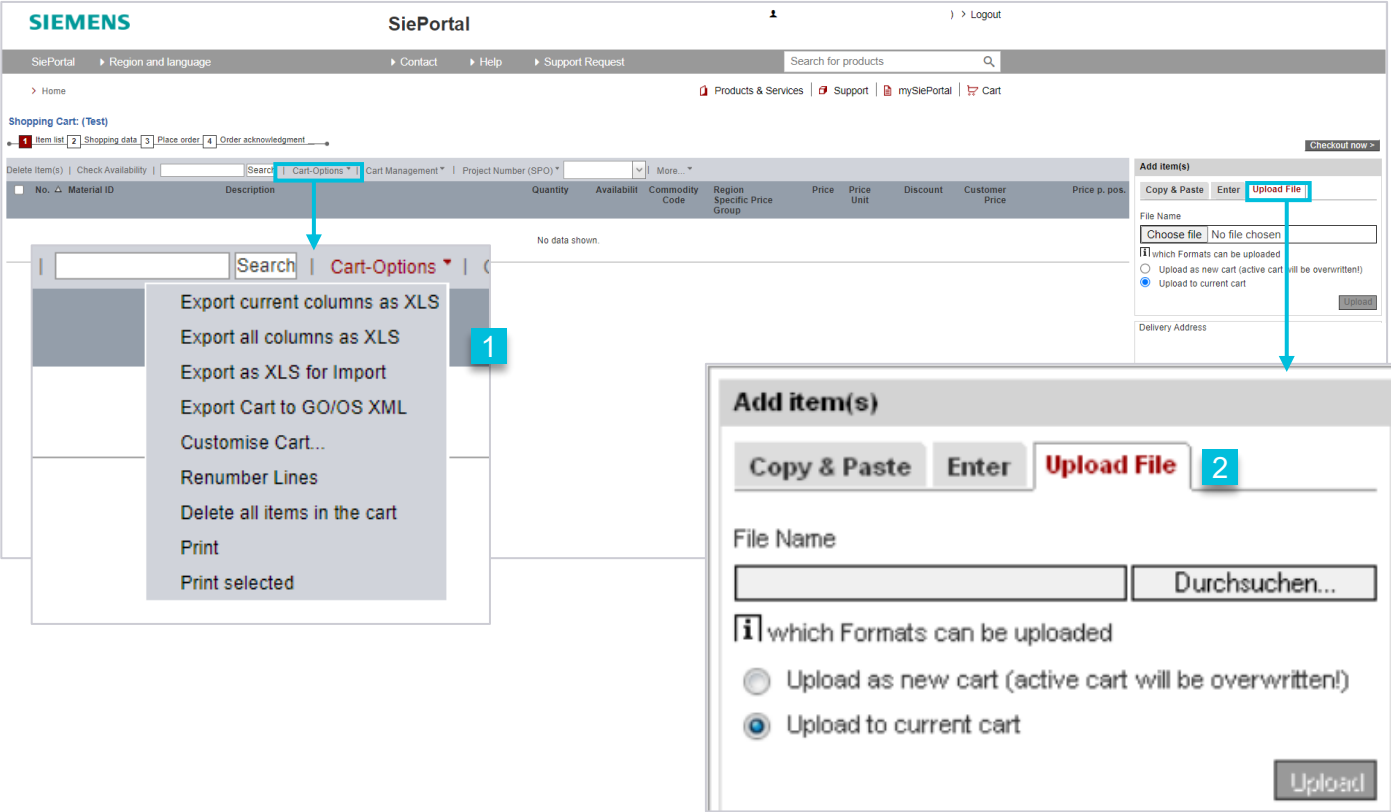

1. In the top right corner of SiePortal, you'll find the 'Cart' icon. Clicking on it will take you to your active cart.
2. Within the cart, under the 'Shopping Cart Management' menu item, you'll find the 'Save Shopping Cart' function. This allows you to save multiple shopping carts for recurring orders and reactivate them at any time.
3. Assign a project code to the entire cart or to individual items by clicking on 'Project Number'. Select the desired option and enter the code.

[Return to Table of Contents](#)

# Order on SiePortal

## Upload product lists to cart

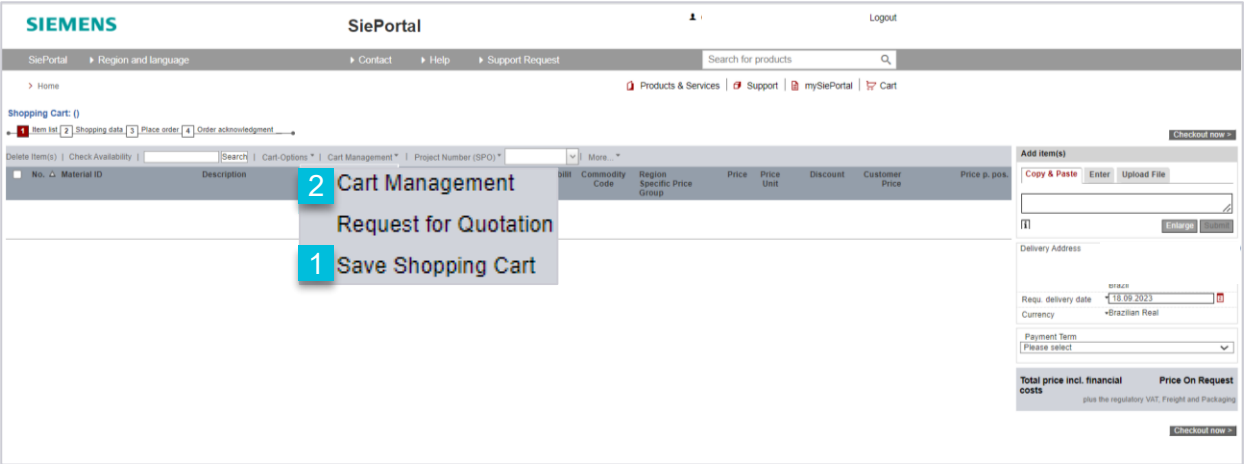

The upload function allows you to easily import many items into the shopping cart at once.

1. Download template examples in Excel or XML format from the shopping cart under 'Cart-Options' (export function).
2. You can upload a [Mall Excel file](#), a [Mall-XML file](#). Newly uploaded items can be forwarded to a new cart or added to the current cart.

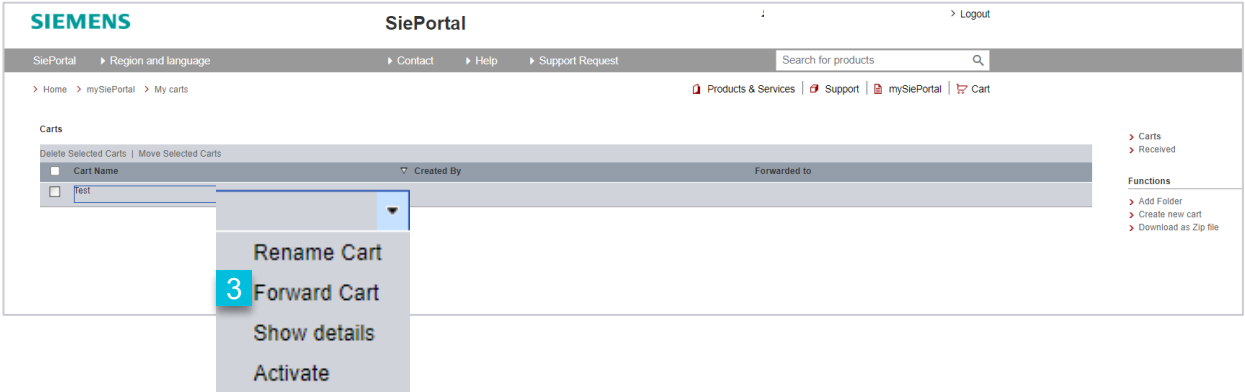

[Return to Table of Contents](#)

# Order on SiePortal

## Forward shopping cart to other users

1. To forward your shopping cart, it must be saved.
2. Go to the shopping cart management to view all saved shopping carts.
3. From the drop-down menu of the respective shopping cart, select 'Forward'. Choose the user within your company to whom you want to send the cart. They will receive an email notification.

1		24,46 EUR	16.10.12 3

### Delivery Date

Your shopping cart already specifies the earliest possible desired delivery date. But you have a few options to change it as needed – for all or only certain items.

### Requested Delivery Date

When ordering you can enter a requested delivery date. You have the option to enter a requested delivery date per cart or per item.

1. Complete delivery: Enter your preferred delivery date in the 'Requ. delivery date' field.
2. Partial delivery: Click 'Requ. delivery date' to open the drop-down menu. Select 'Per Item'.
3. A new column 'Requ. delivery date' will be added to the cart. Specify the delivery date for each individual item in this column.

### Ordering Tip

After entering your requested date, [check the availability](#) of your ordered products again.

# SiePortal Guide

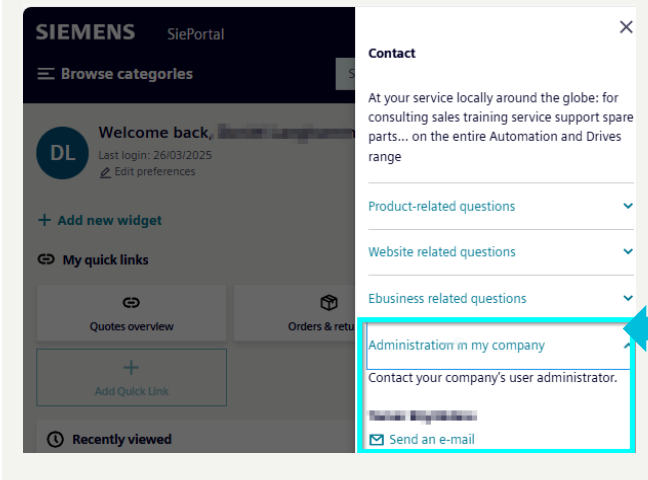

## – Administration as a Company Manager

A comprehensive overview of the most relevant SiePortal administration topics for Company Managers

# Administration on SiePortal as a Company Manager

## Introduction

In this chapter, we equip **Company Managers (CM)** with the knowledge to autonomously handle their own user and company administration on SiePortal, providing **ease and independence**.

### What is a Customer Manager (CM)?

Each company should have a designated Customer Manager responsible for managing specific settings within their organization. The Customer Manager ensures that only authorized users from their company have access, while also overseeing the completeness and quality of the company's data.

#### These settings include:

- Managing their company's primary delivery address and all additional delivery addresses
- Managing or adding customer-specific article numbers
- Managing existing users or creating new users for their company

#### Take note:

Customer Managers can **only manage** and **view user rights that are identical to their own rights**.

### What are the responsibilities of a Company Manager?

- Please review your company's data base, roles, and rights annually to keep them up-to-date
- Please remember to update or remove users that have changed positions or left your company

### How to find your Company Manager in SiePortal

- As a logged-in SiePortal user open the 'Need Help' Link on SiePortal top right side and find in the Contact Drawer the Email-Address of your Company Manager

[Return to Table of Contents](#)

# Administration on SiePortal

## Access user management

Access user management

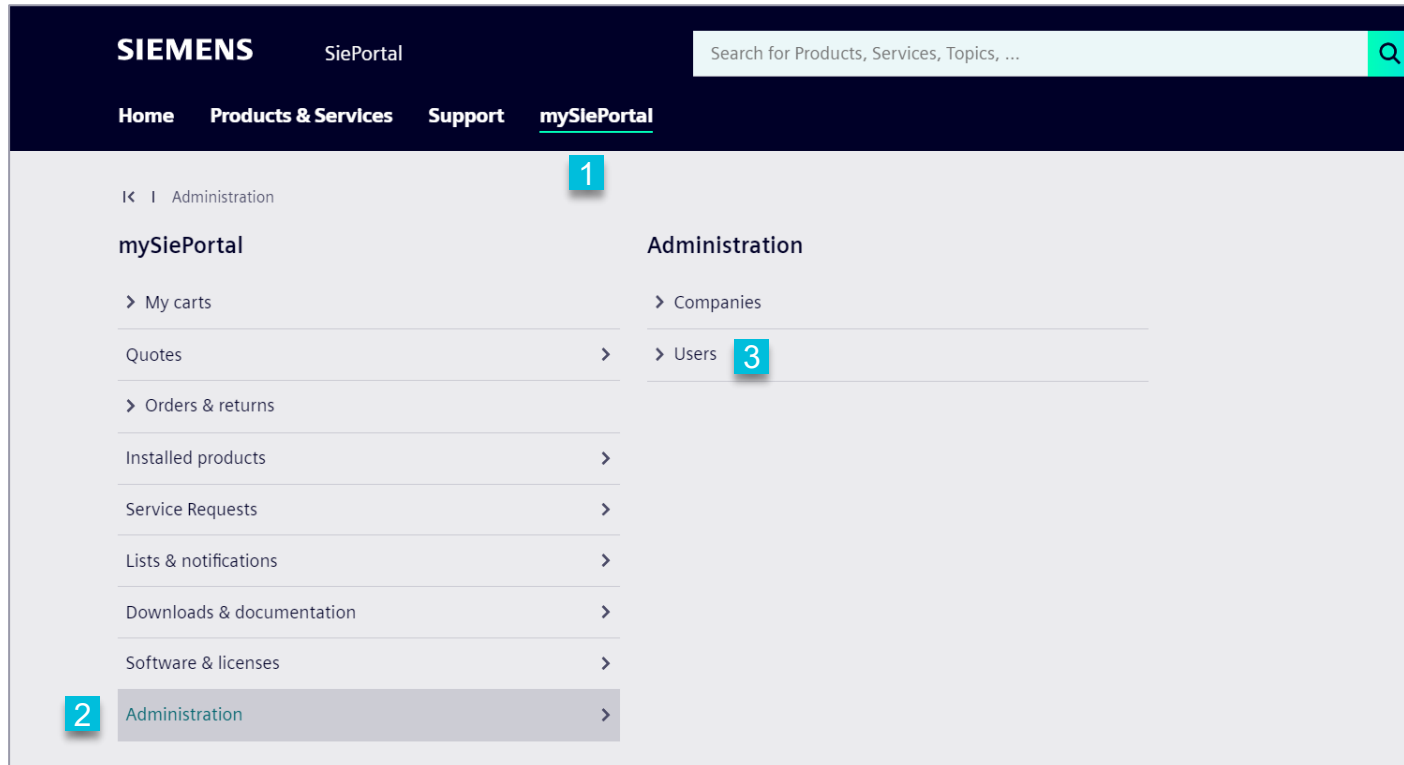

Manage user rights

Set up order  
notifications

View company details

Enter delivery address

Manager customer  
article numbers

**As a Company Manager you can efficiently manage the users of your company directly on SiePortal:**

- Create new users or delete existing users
- Assign specific rights to specific users (such as order rights, display of conditions, order overview, etc.)
- Set up/change order notifications for other users in your company

### To access user management

1. hover over 'mySiePortal'
2. click on 'Administration'
3. click on 'Users'

**As a Company Manager you can efficiently manage the following topics for your company directly on SiePortal:**

- Add/change delivery address(es) for your company
- Add/manage your company's article numbers for Siemens products

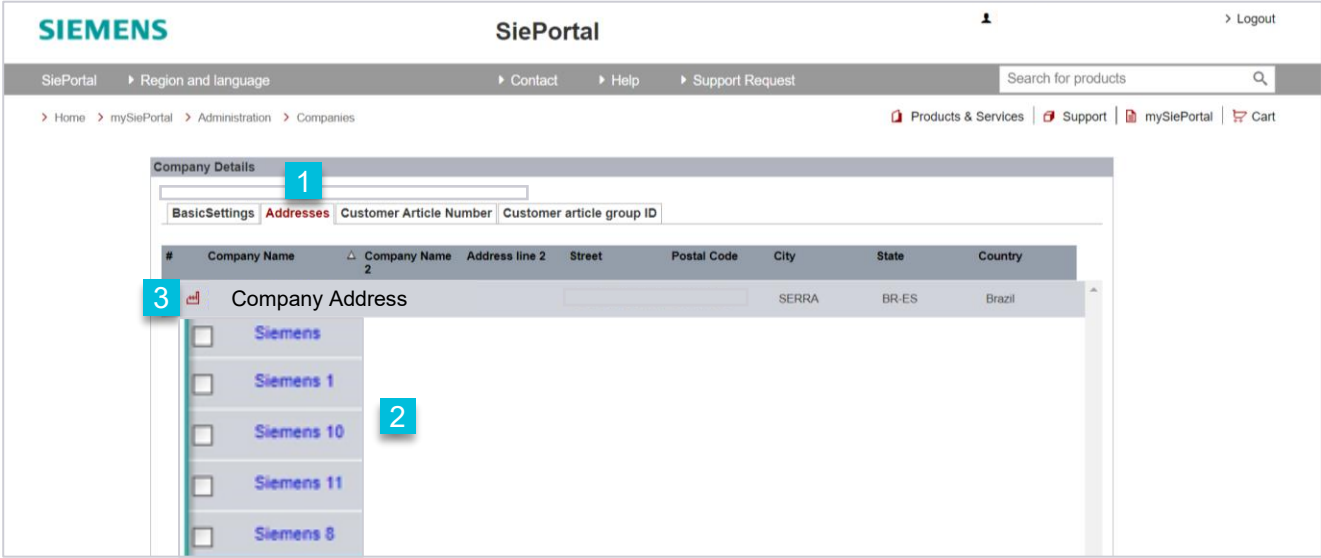

**To access the company details**

1. hover over 'mySiePortal'
2. click on 'Administration'
3. Click on 'Companies'

[Return to Table of Contents](#)

# Administration on SiePortal

## Enter delivery address on company level

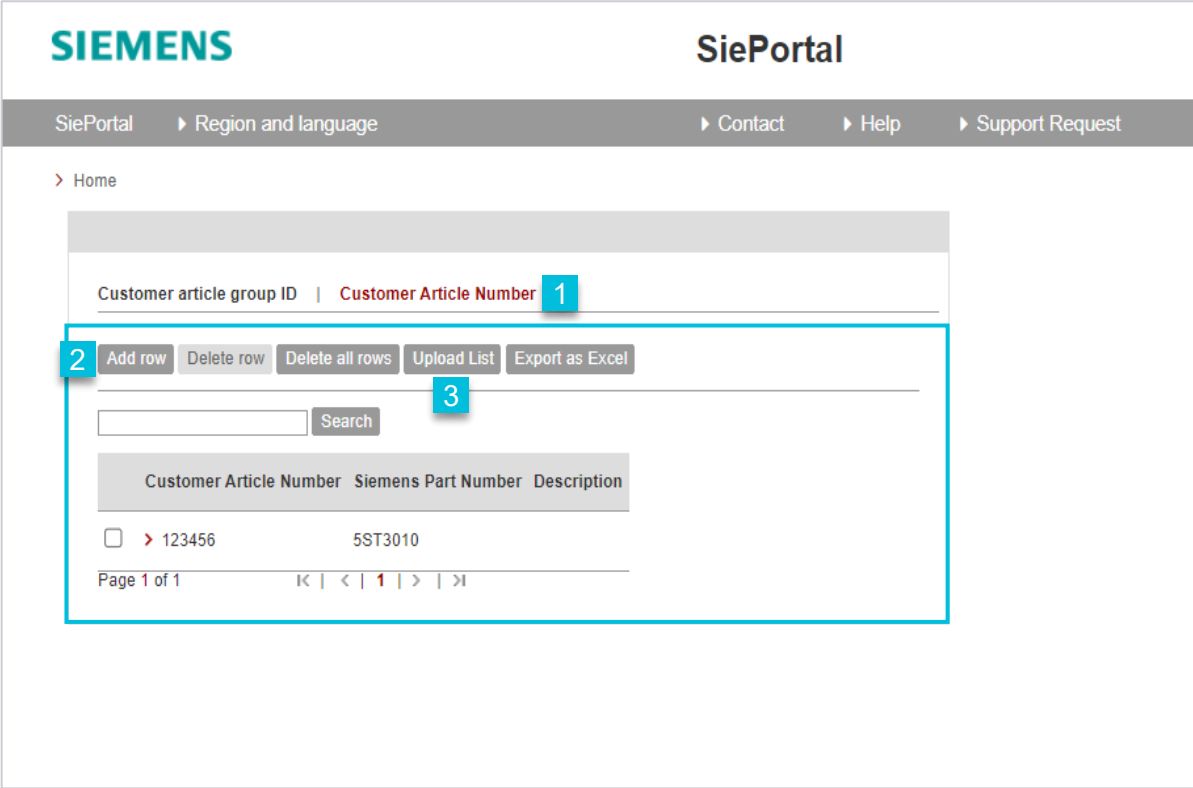

1. As a Customer Manager, you can create a list of delivery addresses, allowing you to select one of the saved delivery address in the shopping cart.
2. Delivery addresses that have been created and saved in the shopping cart will also be shown in this list.
3. The address with the red icon is the 'main company address' and should not be changed or only in case your company name has changed.

Hint: The delivery address is valid for the entire company. If an address is changed, it will impact the addresses in other users' carts.

# Administration on SiePortal

## Manage customer article numbers

This feature can be found at:  
'Administration/Companies/CompanyDetails/CustomerItemNumber.'

**Find easily Siemens products with your own product numbers** by assigning each Siemens product your customer article number.

1. As a Customer Manager, you can assign customer-specific article numbers (CAN) to Siemens products, allowing you to search for and order products with your own article numbers in SiePortal.
2. Click 'Add row' to add your customer article number to any Siemens product. Optionally, you can add your own product description.
3. For mass changes, we recommend using the 'Upload List' feature. The list needs to contain the three columns: *Customer part number*, *Siemens part number* and *Description*. You can easily use an exported list as a template.

# SiePortal Guide

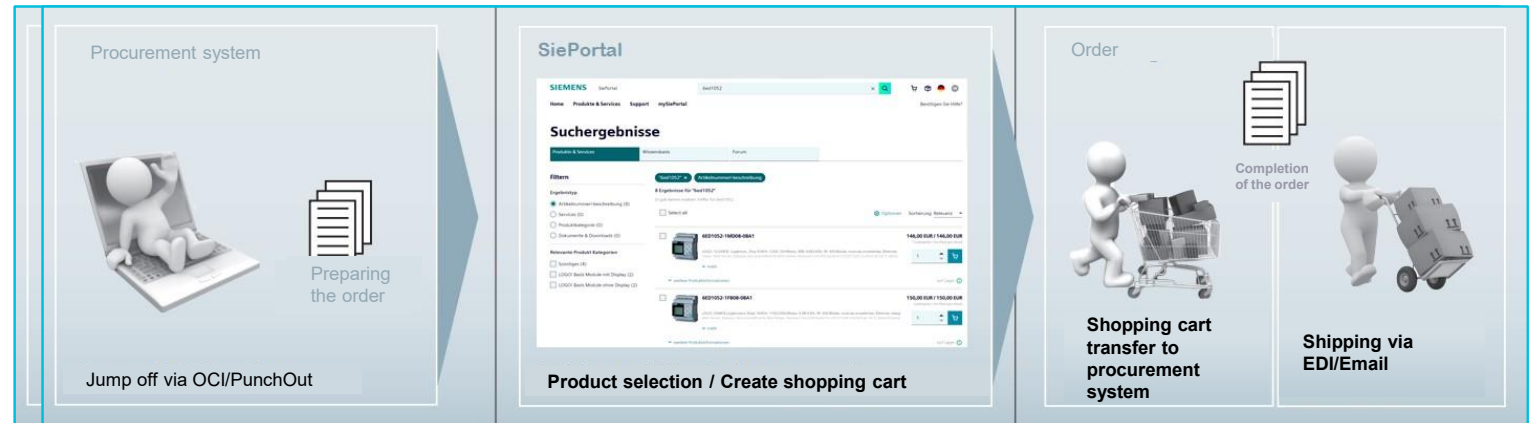

## – Get more information about Catalog interface

Information about OCI & cXML

OCI refers to: **O**pen **C**atalog **I**nterface, a standard interface of SAP and enables the connection between open catalogs (e.g., SiePortal) and ERP systems (e.g., SAP).

The registration takes place in the background without manual effort.

Product data can be accessed from SiePortal in the shopping cart of your ERP system.

OCI is available in versions 4 and 5

In version 4, the 'Checkout' function is implemented: The checkout button in the shopping cart is replaced by a 'Send shopping cart to ERP system' button. This allows you to conveniently transfer product data from the selected shopping cart to your ERP system

Version 5 provides the functions 'Checkout', 'Validate', 'Background\_Search' and 'Detailed'

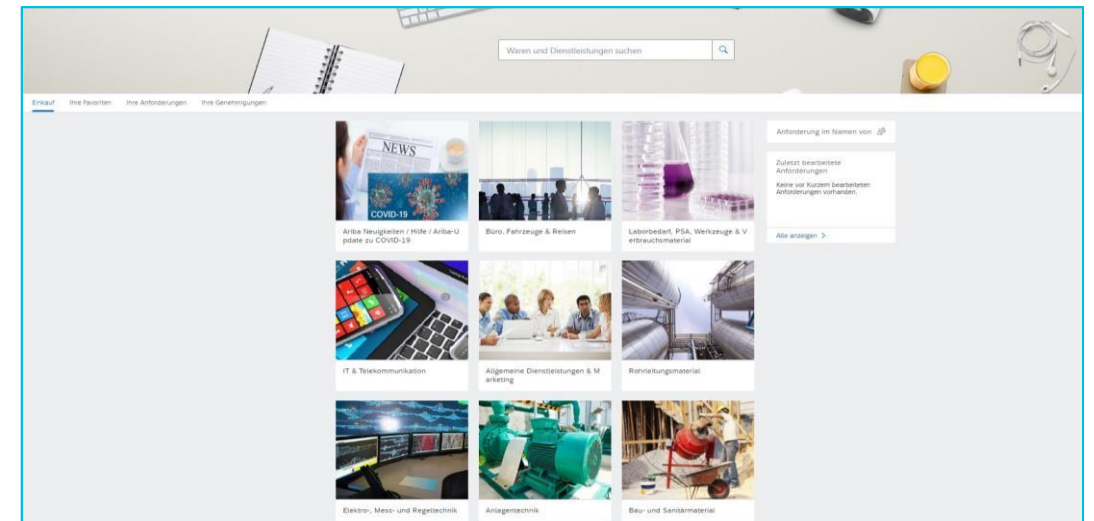

- Checkout: Analogous to version 4
- Validate: Background query in MLFBs portal and quantity. The result is transferred to your system without calling the SiePortal pages
- Background\_Search: Background request to SiePortal with a search term. The result for all MLFBs where the search term was found in the description is transmitted to your system.
- Detail add: Request to SiePortal with MLFB included. You will be redirected to the product detail page of the desired product on the SiePortal pages. The rest of the process corresponds to the checkout function.

[Return to Table of Contents](#)

cXML may refer to: commerce eXtensible Markup Language, a standard for transferring data between applications. The documents contain data in the form of tag/value pairs, similar to HTML.

cXML enables the connection between our open catalog (SiePortal) and an external platform (e.g., SAP Ariba or Coupa)

- You access SiePortal directly via the external platform
- The login is based on a 'by ID' (customer), 'by ID' (Siemens) and a 'Shared Secret' (password)
- Product data can be transferred from SiePortal to the shopping cart of the external platform
- The result is a Base64 code that is encrypted in your platform

**1 Maybe this solution solves your problem:**

To establish communication between a CPU-214 and a Danfoss converter (model FC302PQ) to read and write data, you can use the Modbus/TCP protocol. Below is an example of how you can set up and use the Modbus communication blocks in a Siemens PLC using TIA Portal.

**Step-by-Step Guide:**

- Create a Modbus Communication Block:**
  - Use the integrated Modbus blocks in TIA Portal for Modbus/TCP communication.
  - Ensure you have the Modbus library installed in your TIA Portal project.
- Configure the Modbus Communication:**
  - Set up the Modbus communication parameters such as IP address, port number, and unit ID of the Danfoss converter.
- Example Code:**
  - Below is an example of how to configure and use the Modbus communication blocks to read and write data.

**Example Ladder Logic for Modbus Communication:**

```
// Network 1: Initialize Modbus Communication
// Call the Modbus Init block to set up the communication parameters
CALL "MB_COMM_LOAD"
REQ := TRUE
PORT := 502 // Standard Modbus TCP port
IP_ADDR := "192.168.0.10" // IP address of the Danfoss converter
UNIT_ID := 1 // Unit ID of the Danfoss converter
```

**Notes:**

- Ensure that the IP address and unit ID match the configuration of your Danfoss converter.
- The **DATA\_ADDR** should be set according to the Modbus register map of the Danfoss converter.
- The **DATA\_PTR** should point to the correct data block in your PLC where the read/write data is stored.

For more detailed information and additional examples, you can refer to the sample library for Modbus instructions provided by Siemens [5].

**Disclaimer:**

Pricing provided by this chatbot are intended solely for informational purposes and reflect general list prices. They do not in any case constitute a binding offer towards a customer. We advise contacting Siemens through our official channels for verified offers.

**References:**

- [5] How do you use the blocks for MODBUS/TCP communication via the integrated PROFINET interface of the CPU in STEP 7 Professional (TIA Portal)?

**Did the solution solved for your problem?**

Yes, problem solved No, I need more help

**Back Create support request**

**The new AI assistant is now available to provide quick and easy answers whenever you need them.**

1. Access the Solution Guide via the Support page by clicking 'Start now'.
  2. Specify your question by entering a product for a more accurate response. You can also skip this step.
  3. Type your question in your preferred language and click 'Ask the AI.'
- Note: Responses are generated using Generative AI technology and may not be entirely accurate or intended as professional advice.*
4. The AI assistant is trained on the Knowledge Base and can provide all support-related content, eliminating the need to browse manually.
  5. You'll also receive direct links to relevant Knowledge Base documents for further reference.
  6. Help us improve the AI by letting us know if the answer was helpful.

## Tailor products with the Siemens Product Configurator

The screenshot shows the Siemens Product Configurator interface. At the top, there's a search bar with the text '1ft2' and a 'Search' button (callout 1). Below the search bar, a dropdown menu shows 'SINAMICS S210 and SIMOTICS S-1FK2' (callout 2). The main interface is divided into several sections. On the left, there's a sidebar with a 'Configuration' tab and a list of options: Motor, Converter, Selection, Selection based on power data, Selection acc. to mechanical data, Drawing, Motor details, Degree of protection, Options, Converter, Power components, Software options, Accessory, Cables, and Digital offerings (callout 6). The 'Motor' option is selected. In the center, there's a 'Motor' section with a dropdown menu showing '1AC 230V', '3AC 240V', '3AC 400V', and '3AC 480V' (callout 3). Below this, there's a 'Selection based on power data' section with options for 'Cooling' (Natural cooling, Forced ventilation) and 'Static torque' (0.16 Nm ≤ ... ≤ 50.00 Nm). To the right, there's a 'Selection' section with a dropdown menu showing 'Motor' and 'Geared motor'. Below this, there's a 'Selection acc. to mechanical data' section with options for 'Shaft height (from - to)', 'Centering edge & hole circle', 'Shaft end D x Length\*', and 'Shaft end\*' (callout 4). At the bottom right, there's a 'Results & Documents' section with a button 'Add to product list' (callout 5) and a 'Share' button. A modal window is open in the foreground, showing 'Configuration complete' and 'on request' status, with a button 'Results & Documents' (callout 7) and a button 'Add to product list'.

1. To open a configurator directly, use the search field, enter the MLFB, and click the product.
2. After opening the configurator, you can view the configuration options in the left sidebar.
3. This feature lets you complete the selection fields without scrolling through the entire page.
4. After configuring your product, the button turns blue. Clicking it lets you download several documents (see next slide).
5. Add the configured product to your list for future reference or share it using the 'Share' button.
6. Click this icon in the sidebar to display your product list with all products that have been added.
7. Click the downloads icon in the sidebar to easily view previous downloads.

The screenshot shows a forum thread titled "Display Dword from LOGO to hour format" with a green checkmark and a blue callout '1'. The thread is in the "SIMATIC WinCC (TIA Portal)" category, with sub-categories "LOGO\_Grundlagen" and "LOGO\_Software". The user "Ale.Bon.ITA" (account deleted) posted on April 21, 2016. The post asks how to display the parameter "OT" of Hours counter SF from LOGO! program in a format hh:mm instead of decimal. A reply from "Moderator-Test" (ID #591728) is highlighted as the "Recommended most helpful reply" with a green checkmark and a blue callout '5'. The reply explains that the LOGO! sends timebase minutes and provides a calculation: 01:20 (hh: mm) = 60 + 20 min = 80 min. It also suggests preparing hours and minutes separately in the LOGO! program. A blue callout '6' points to the "Like content" button (heart icon). A blue callout '3' points to the "Reply" button. A blue callout '4' points to the "Report" button in the dropdown menu. A blue callout '7' points to the "Bookmark and Notification" icons (bookmark and bell). A blue callout '2' points to the "Categories" list on the right side of the page.

**Display Dword from LOGO to hour format** ✓ 1

in SIMATIC WinCC (TIA Portal) LOGO\_Grundlagen LOGO\_Software

Ale.Bon.ITA [account deleted]

Dear All,

How can I display the parameter "OT" of Hours counter SF from LOGO! program in a format hh:mm instead decimal (example LOGO 01:20 = 80 TIA Portal I/O filed) in TIA portal?

Thanks

✓ Recommended most helpful reply by Moderator-Test in #591728

Hello,  
this is not possible. The logo sends the timebase minutes.  
01:20 (hh: mm) = 60 + 20 min = 80 min.  
If you want to hours and minutes have in the TIA Portal you need to prepare separately in the logo program the hours and minutes separately and send separated to TIA-Portal.
