Converter losses to IEC61800-9-2*		
Efficiency class	IE2	
Comparison with the reference converter (90% / 100%)	28.4 %	

The percentage values show the losses in relation to the rated apparent power of

The diagram shows the losses for the points (as per standard IEC61800-9-2) of the relative torque generating current (I) over the relative motor stator frequency (f). The values are valid for the basic version of the converter without options/components.

<sup>\*</sup>calculated values

<sup>1)</sup> The output current and HP ratings are valid for the voltage range 440V-480V
