Data sheet for SINAMICS V20

Article No. :

6SL3210-5BE32-2UV0

The percentage values show the losses in relation to the rated apparent power of the converter.

The diagram shows the losses for the points (as per standard IEC61800-9-2) of the relative torque generating current (I) over the relative motor stator frequency (f). The values are valid for the basic version of the converter without options/components.

*calculated values

 $^{1)}$ The output current and HP ratings are valid for the voltage range 440V-480V $^{2)}$ Please observe derating at temperatures of 40 $^\circ C$ or above
