Converter losses to IEC61800-9-2*	
Efficiency class	IE2
Comparison with the reference converter (90% / 100%)	63.07 %

The percentage values show the losses in relation to the rated apparent power of the converter

The diagram shows the losses for the points (as per standard IEC61800-9-2) of the relative torque generating current (I) over the relative motor stator frequency (f). The values are valid for the basic version of the converter without options/components.

\*calculated values

 $<sup>^{1)}</sup>$ In firmware V4.7 and higher, due to legal requirements, the maximum output frequency is restricted to 550 Hz.
