## Converter losses to IEC61800-9-2\*

IE2

•

Comparison with the reference converter (90% / 100%) 37.5 %

The percentage values show the losses in relation to the rated apparent power of the converter.

The diagram shows the losses for the points (as per standard IEC61800-9-2) of the relative torque generating current (I) over the relative motor stator frequency(f). The values are valid for the basic version of the converter including line choke without options/components.
